Get Covered Illinois
Region Guide
2014 - 2015

To Enrollment Workforce Partners in Illinois:

With the overwhelming success of the first year of the Get Covered Illinois (GCI) campaign, our team is committed to continuing our momentum until every Illinois resident is given the opportunity to access the quality health coverage he or she deserves.

To build upon the success of Year One and improve efficiency in our outreach programs, the GCI team has established new regional boundaries for Year Two. The newly defined regions, which are based on factors including geographic boundaries, county lines, demographics, population, number of uninsured and Public Use Microdata Areas (PUMAs), will streamline outreach efforts and represent a more equal distribution of resources.

Each of the ten regions is staffed by a Regional Outreach Coordinator (ROC), whose objective is to serve as a conduit for community engagement, outreach opportunities and enrollment activities that aim to provide the uninsured with opportunities to access affordable health coverage. By updating existing resources and creating new ones, such as this Region Guide, our aim is to provide you with the information and resources to effectively assist you in your efforts to engage and enroll members of your community.

We hope you will find this book useful, not only in connecting you with regional GCI representatives, but also in helping you collaborate with other organizations — and across regions — in order to make Year Two another resounding success.

Thank you again for your dedication to helping spread the culture of coverage in Illinois. We are looking forward to another incredible year of partnership and successful enrollments.

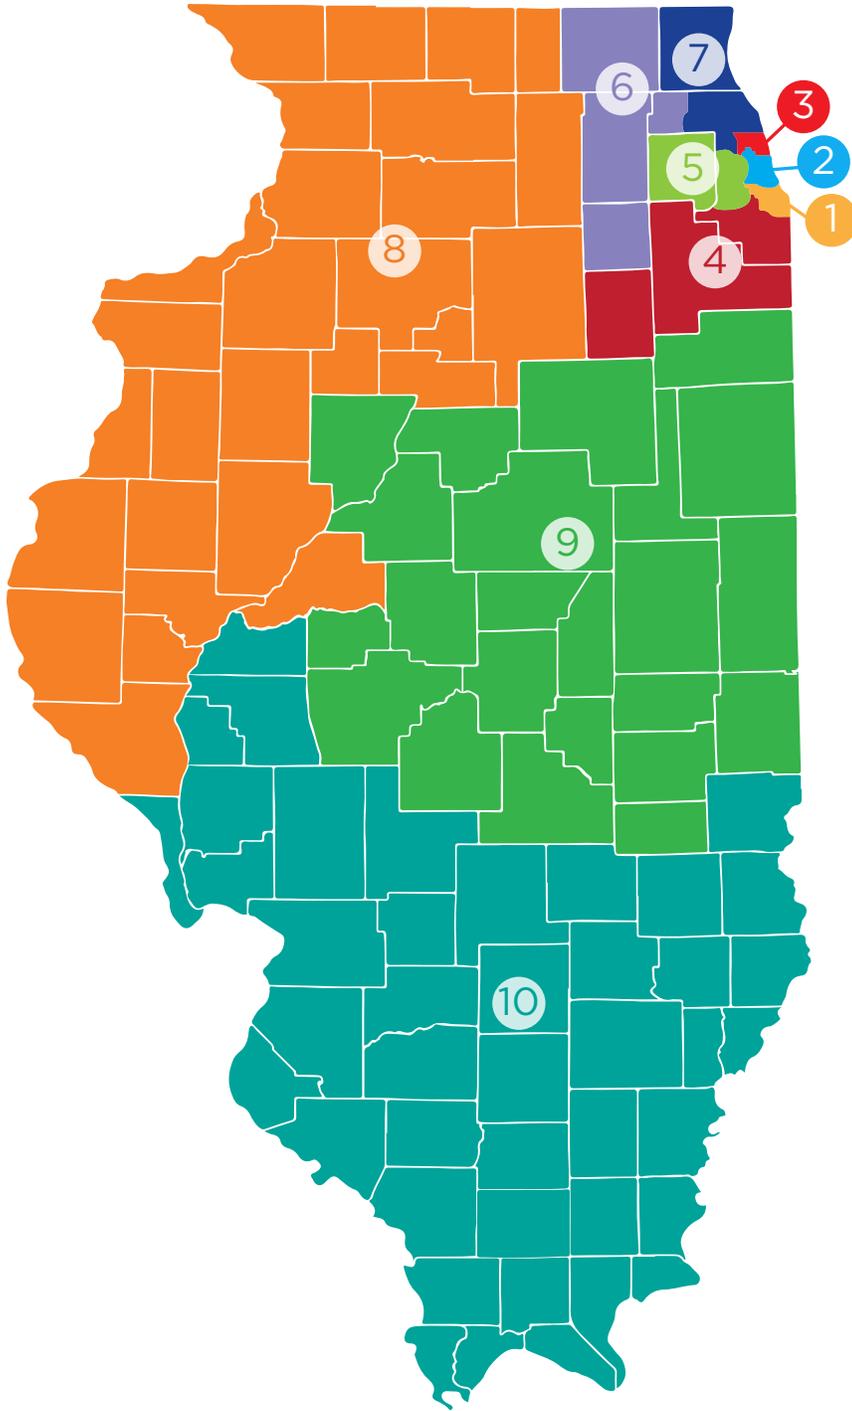

Sincerely,

Brian Gorman
